HO
$$CO_2R^1$$
HO OH
 R^2

wherein R^1 = hydrogen, a cationic salt moiety, or a lower alkyl; and R^2 = Cl or CF₃.

Claim 34. (Amended) A topical ophthalmic composition for the treatment of glaucoma and ocular hypertension in primates, comprising topically a therapeutically effective amount of a compound of formula:

HO
$$CO_2R^1$$
HO R^2

wherein R^1 = hydrogen, a cationic salt moiety, or a lower alkyl; and R^2 = Cl or CF₃.

Claim 40. (Amended) The composition of claim 39, wherein between about 0.01 and about 100 $\mu g/eye$ of a compound of formula (I) is administered.
